info@strategicit-solutions.com

StrategicIT Solutions specializes in strategic business and technology solutions for federal and commercial organizations.

## Philosophy and Mission

StrategicIT Solutions' mission is to help clients conceptualize, analyze, and execute strategic business initiatives to maximize competitive advantage.

## Services

StrategicIT Solutions offers an array of specialized offerings with primary focus in:

### IT Strategy and Transformation

- **Strategic Planning Support**  
Develop and maintain strategic plans that enables organizations to align their mission, vision, goals, strategies and objectives.
- **Monitoring and Measurement using Balanced Scorecard**  
Design and implement industry specific Key Performance Indicators (KPIs) to assess performance of organizational functions against their intended goals.
- **Application Strategy, Selection and Rationalization**  
Assist organizations with selection of right software solutions through analysis of application capabilities against organizational needs and maturity, design of selection criteria using weighted scorecard, and rationalization through business case.

### Project Portfolio Management

- **Project Portfolio Management**  
Develop and maintain processes and means to support tracking, integration, and oversight of core business projects to improve the effectiveness and efficiency of the organization.
- **Project Identification and Prioritization**  
Design a process and a set of evaluation criteria to assist organizations in applying a selection approach to identify projects that provide the most benefit to the organization.
- **Project Execution**  
Manage selected projects to quality, schedule, cost and resource expectations as defined by the project performance criteria.

### Project Management Office (PMO) Setup and Operations

- **PMO Design**  
Design processes for Project Management Office (PMO) tailor-made to client organization's maturity level.
- **Build and Configure**  
Configure and implement the PMO processes using our proprietary ePMOLite tool.
- **Manage**  
Execute and operate the PMO functions using a managed services model or through staff augmentation.

### Staff Augmentation

- **Program and Project Managers**  
With relevant industry/technology expertise and certification - PMP, PgMP, CSM, SAFe
- **ERP Specialists**  
Functional and Technical SMEs for PeopleSoft, Oracle Fusion and SAP implementations.
